

CONTENTS

Martin Ortiz-Domínguez, Mourad Keddam

Kinetics, nanomechanical and tribological characterizations of Fe₂B layers on ASTM A29 steel 131

Natalija Dolić, Zdenka Zovko Brodarac, Franjo Kozina

Spatial variability of HV5 hardness in industrial direct chill cast EN AW-5083 ingots
in the as-cast and homogenized conditions 149

Grzegorz Tęcza

Microstructure and abrasive wear resistance in the Miller test of a martensitic Fe-C alloy
with V and W carbides 163

Xinlong Nie, Shannan Li, Qi Xu, Jianli Lia

Interface interaction between complex oxides and matrix of Si-Mn deoxidized steel
during heat treatment 177

Varun Kumar Kurapati, Makkuva Kalyan Phani, Arghya Majumder

Role of molybdenum in mining grade NiCrMo steels from an industrial perspective 195

Mohamed Ahmed Mohamed Ahssi, Harun Çuğ, Bekir Güney,

Mehmet Akif Erden, Mustafa Acarer

Wear properties of Ni addition to Nb-V micro alloyed PM steels in dry and corrosive environment 211

Sharada Prasad Shukla, Sujith Bobba, Mukkollu Sambasiva Rao,

Kamlesh Kumar Singh, Amitesh Kumar

Effect of destabilization heat treatment on the microstructure and wear properties of
ASTM A532 high-chromium white cast iron 229

Qiang Yu, Guli Riziwan, Pengfei Qi, Ruixin Gong, Qian Zhang, and Wentao Qu

Influence of heat treatment on the microstructure, phase transformation,
and thermal cycling stability of NiTiZr alloys 243

Oguz Berk Ozdemira

Influence of crack morphology on creep-stage modelling of 316L(N) austenitic stainless steels 257

Xiaojie Liu, Yanping Geng, Hongwei Li, Yujie Zhang, Yifan Duan, Xin Li

Knowledge graph for blast furnace condition prediction and root cause tracing 267
