

**NEW BOOK:
RESEARCHES ON RARE EARTHS
History and Technology**

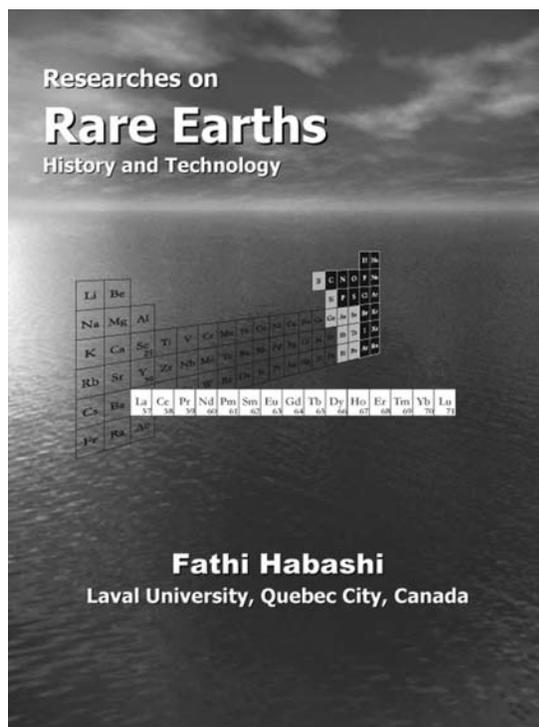

Author: Fathi Habashi
Laval University, Quebec City, Canada

A selected collection of papers by the author and his co-workers on the history and extractive metallurgy of the rare earths to which an outline on the recovery of rare earths from different sources has been specially written. The position of rare earths in the Periodic Table is also discussed. Fully illustrated 125 pages in color. The author is Professor Emeritus at Laval University in Quebec City, Canada.
