

## NEW BOOKS:

### Some Thermodynamic, Structural and Behavioral Aspects of Materials Accentuating Non-crystalline States

Edited by  
**Jaroslav Šesták**      **Miroslav Holeček**      **Jiří Málek**

Published by Municipally Beneficial Society - Responsible: Michal Hanzelín, Máchova 1492, CZ-28802 Nymburk, Czech Republic ([www.o-p-s.cz](http://www.o-p-s.cz))

Printed and bound by Typos, Pilsen, CZ 2009.

ISBN 978-80 87269 06-0

#### CONTENTS:

Preface

Introducing non-crystalline, disordered, amorphous, vitreous and glassy concepts

*C.A. Queiroz (Portugal), J. Sestak (Czechia)*

1. Some historical features focused back to the process of european education revealing some important scientists, roots of thermal analysis and the origin of glass research

*J. Šesták (Czechia)*

2. Phenomenological meaning of temperature

*J. J. Mareš (Czechia)*

3. From carnot to nonequilibrium and abstract thermodynamics and some consequences for thermal analysis

*M. Holeček (Czechia)*

4. New thermodynamic potentials and clapeyron equations for condensed partly open systems applicable to nonstoichiometric phases

*P. Holba (Czechia)*

5. The phases between solid and liquid,

characterized by thermal analysis

*B. Wunderlich (USA)*

6. Phase separation in polymer systems

*I. Krakovský (Czechia), Y. Ikeda (Japan)*

7. Some important features of glassiness and the nature of amorphous solids

- H. Suga (Japan)*  
8. Biological glasses and their formation during overwintering and cryopreservation of plants  
*J. Zámečník, J. Šesták (all Czechia)*
9. Properties of some natural glasses: australian opals and czech tektite moldavites  
*P.S. Thomas (Australia), K. Heide (Germany), J. Šesták (Czechia), E. Fúglein (Germany), P. Simon (Slovakia)*
10. Chalcogenide glasses as model systems for studying thermal properties  
*Z. Černošek, J. Holubová, E. Černošková (all Czechia)*
11. Application of isoconversional methods for the processes occurring in glassy and amorphous materials  
*P. Simon (Slovakia), P.S. Thomas (Australia)*
12. Crystallization kinetics in amorphous and glassy materials  
*D. Švadlák, P. Honcová, J. Málek (all Czechia)*
13. On the application of dta/dsc methods for the study of glass crystallization kinetics  
*V.M. Fokin (Russia), A. Cabral Jr., M. L.F. Nascimento, E. D. Zanotto (all Brazil), J. Šesták (Czechia)*
14. Crystallization of metallic micro- and nano- crystalline glasses  
*E. Illeková (Slovakia), J. Šesták (Czechia)*
15. Transport and relaxation mechanisms in ionic phosphate glasses  
*P. Bury, P. Hockicko (all Slovakia)*
16. Studying structure and thermal properties of oxide glasses  
*M. Liška (Slovakia)*
17. Non-bridging oxygen in silica bio-compatible glass-ceramics and magnetic properties of Fe<sub>2</sub>O<sub>3</sub> added borate glasses  
*J. Šesták (Czechia), N. Koga (Japan), Z. Strnad (Czechia)*
18. Structural changes in liquids, creation of voids, micro-movement of vibration centers and built-in blocks toward the glass transition temperature  
*B. Hlaváček, J. Šesták (all Czechia)*
19. Viscosity, diffusion and entropy: a novel correlation for glasses  
*I. Avramov (Bulgaria)*
20. Transdisciplinary of diffusion including aspects of quasiparticles, quantum diffusion and self-organized reaction periodicity  
*Z. Kalva, J. Šesták, J.J. Mareš, J. Stávek (all Czechia)*
21. Low-temperature measurements of disorder-induced effects in low-dimensional systems  
*P. Hubík, J. J. Mareš (all Czechia)*
22. Diffusion structural diagnostics of self-irradiated amorphous minerals  
*V. Bálek (Czechia), I. von Beckman (Russia)*
23. Basalt filaments - properties and applications  
*J. Militký, V. Kovačič, D. Křemenáková (all Czechia)*
24. Nuclear waste glasses: beautiful simplicity of complex systems  
*P.R. Hrma (USA)*
25. Physico-chemical surface properties, their modifications and healing capacity of inorganic endosteal biomaterials used for mimetic bone substitution in implantology  
*J. Strnad, Z. Strnad (all Czechia)*
26. Geopolymers - amorphous ceramics via solution  
*F. Soukal, T. Opravil, P. Ptáček, B. Foller, J. Brandštetr, P. Roubíček (all Czechia)*
27. Application of scanning transmittometry in petroleum industry and in polymer and food sciences  
*J.-P. E. Grolier (France)*
