

CONTENTS

M. Benke, Zs. Salyi, G. Kaptay Investigation of dissolution resistance of blank and gas-nitrided carbon steels in stationary SAC305 solder alloy melt	283
Lj. Avramović, M. Bugarin, D. Milanović, V. Conić, M.M. Pavlović, M. Vuković, N.D. Nikolić The particle size distribution (PSD) as criteria for comparison of silver powders obtained by different methods of synthesis and by conditions of electrolysis	291
P.I. Guntoro, A. Jokilaakso, N. Hellstén, P. Taskinen Copper matte - slag reaction sequences and separation processes in matte smelting	301
S. Bakhshandeh, N. Setoudeh, M. Ali Askari Zamani, A. Mohassel Carbothermic reduction of mechanically activated NiO-carbon mixture: Non-isothermal kinetics	313
M. Hawryluk, B. Mrzyglod A system of analysis and prediction of the loss of forging tool material applying artificial neural networks	323
M. Deepa, G. Sahoo, S.K. Dhua Effect of molybdenum addition on hardenability of chromiumboron steels used for press hardening applications	339
D. Janovszky, F. Kristaly, T. Miko, M. Sveda, A. Sycheva Development of novel ultrafine grain Cu metal matrix composites reinforced with Ti-Cu-Co-M (M: Ni, Zr) amorphous-nanocrystalline powder	349
M. Keddam, M. Kulka Analysis of the growth kinetics of Fe ₂ B layers by the integral method	361
Y.Z. Di, J.P. Peng, Y.W. Wang, N.X. Feng Extracting lithium from a lithium aluminate complex by vacuum aluminothermic reduction	369
J. Piroskova, J. Trpcevska, D. Orac, M. Laubertova, H. Horvathova, B. Holkova Production of zinc oxide from hazardous waste - Sal Ammoniac Skimming	377
P. Ju, K. Ryom, K. Hong Separation of iron-nickel alloy nugget from limonitic laterite ore using self-reduction	385
Y. Li, S. Yuan, Y. Han, S. Zhang, P. Gao Laboratory study on magnetization reduction of CO	393
H. Xie, M.P Wang, W. Chen, Y. Du Effect of accumulative roll bonding process on textural evolution and its comparison with normal rolled AA7005 aluminum alloy	401
Z. Ouyang, Y.F. Chen, S.Y. Tian, L. Xiao, C.B. Tang, Y. J. Hu, Z. M. Xia, Y.M. Chen, L.G. Ye Thermodynamic and kinetics analysis of the sulfur-fixed roasting of antimony sulfide using ZnO as sulfur-fixing agent	411
J. Jing, Y. Guo, F. Chen, F. Zheng, L. Yang Volatilization behavior of tin during carbothermic reduction of tin-bearing middling to recover tin	419
