

CONTENTS

E. Keskinilic	
New trends in basic oxygen furnace dephosphorization	1
S. Gerasin, D. Kalisz, J. Iwanciw	
Thermodynamic and kinetic simulation of Y_2O_3 and Y_2S_3 nonmetallic phase formation in liquid steel ..	11
K. OuYang, Z.-H. Dou, T.-A. Zhang, Y. Liu	
Effect of ZnO/PbO and FeO_x/SiO_2 Ratio on Viscosity of Lead Smelting Slags	27
Z.-G. Yu, H.-Y. Leng, L.-J. Wang, K.-C. Chou	
Evaluation of carbide capacity in CaO-based ternary systems at 1773K for refining process	35
Y.-W. Wang, J. You, A.-G. Wang, J.-P. Peng, Y.-Z. Di	
Production of Mg–Li alloys by aluminothermic vacuum reduction	43
Z.-Y. Zhao, J.-X. Zhao, Y. Cui, L. Lu, G.-H. Wang	
The influence of the volatiles on the slag composition for the heating process	51
G.-H. Wang, Y. Cui, Ze Yang, Z.-L. Guo, L. Zhao, X.-M. Li, J.-X. Zhao, W.-D. Tang	
Volatilization characteristics of high-lead slag and its influence on measurement of physicochemical properties at high temperature	59
S.-Y. Li, K. Liu, F. Yang, F.-S. Xi, J.-J. Wu, W.-H. Ma, Y. Lei, Y.-J. Wang, X.-N. Zhang	
Thermodynamic properties of iron, aluminum, boron and phosphorus in dilute silicon solutions by molecular interaction volume model	69
M. Sadhasivam, L. J. Berchmans, G. K. Meenashisundaram, U. Mehana Usmaniya, S. R. Sankaranarayanan, S.P. Kumares Babu	
A new approach to synthesize nano-yttrium boride particle through metallothermic reduction process ...	77
I. Angela, I. Basori, B.T. Sofyan	
Effect of cold rolling and annealing temperature to the characteristics of $\alpha + \beta'$ Phases in Cu-29.5Zn-2.5Al alloy produced by gravity casting	89
B. Stalin, M. Ravichandran, V. Mohanavel, L. Praveen Raj	
Investigations on microstructure and mechanical properties of Mg-5wt.%Cu-TiB ₂ composites produced via powder metallurgy route	99
Y.-Y. Huang, B. Wu, F. Li, L.-L. Chen, Z.-X. Deng, K. Chang	
First-principles and CALPHAD-type study of the Ir-Mo and Ir-W systems	109
R. Yamanoglu, F. Khoshnaw, I. Daoud, E. Efendi	
Effect of silver content on the wear and mechanical properties of powder metallurgical Ti-5Al-2.5Fe-xAg alloys	119
M.N. Le, M.S. Lee	
Selective dissolution of vanadium(V) from spent petroleum catalysts by oxalic acid solution	127
I.A. Evstyukhina, V.P. Kolotushkin, V.Yu. Miloserdin S.G. Rudakov, S.V. Stepanov, A.L. Udovsky, M.V. Cher-castchenko, Yu.V. Funtikov	
Use of nuclear physics methods for investigation of short-range ordering and defects in iron based simulatuing alloys	135
